IT PAYS TO BE AN AVITROL PEST CONTROL OPERATOR

AVITROL IS EASY TO APPLY

MORE TIME FOR OTHER JOBS

Using Avitrol products according to EPA label directions is simple and application does not require complex tools or extra equipment for use. Target birds will react within minutes and cleanup is fairly easy, leaving you with more time for other jobs. Flocks that are frightened away according to label directions, WILL NOT RETURN.

IT'S HIGHLY PROFITABLE

HIGHER MARGINS AND LOWER COSTS

Bird work as a whole commands a higher profit than many other general pest control operations. In addition, our specialized production techniques allow us to manufacture the product at a price point that keeps material cost low for your business. This means that Avitrol products are among the least expensive bird control methods available, which translates to lower overhead for you and higher profit margins for your business.

AVITROL JOBS ADD RECURRING REVENUE

HAPPY CLIENTS KEEP COMING BACK AND REFER OTHERS

When you use Avitrol products it is recommended that you also set up monthly maintenance programs with your clients. This type of offering is a value added service that may round-out your bird control package and help keep you at the forefront of any pest bird problems they experience. Effectively controlling a pest bird flock for your client keeps them happy and increases your potential for referrals from happy customers.

GAIN A COMPETITIVE ADVANTAGE

SPECIALIZED TREATMENT MEANS LESS SATURATION

Avitrol Pest Bird Control products give you an effective, lower cost solution for clients who don't have thousands to spend on bird management. This allows you to provide true pest bird control at an affordable price. Also, Avitrol applicators find themselves in a much less saturated market than other operators. The greater the degree of specialized service you offer, the better chance that your services are viewed as the solution to tough bird problems in your area.
